

# EVERY STORY IS UNIQUE

ISFJORD Premium Arctic Single Malt Whisky are made at Braunstein on a copper pot - colon distillery as a single malt batch. All Whisky production are made by hand and we only use the finest whisky malt for the distillation.

When the Whisky is ready after 8 - 9 years of maturing in the casks, we blend the cask strength Whisky with the pure and exclusive water from the Greenland ice cap to an alcohol % at 42%. As applies to all ISFJORD products, this pure and smooth water ensures a unique Whisky.

The peated single Whisky matures in American Bourbon Oak casks (Married Casks). This whisky has only a light peated note and is perfectly combined with the taste of vanilla and caramel.

*ISFJORD Premium Arctic Single Malt Whisky #2 - 50 cl - 42% alc./vol.*
